Exp (14) Implement Packet sniffing using Raw sockets

Aim:-

To implement Packet sniffing using non-sockets in python and capture network packets

Procedure:-

1. Open Vs code an create an Python file
2. Import the required sockets and struct libraries
3. Create on configure a new socket using local IP address
4. Run Vs code as administrator and event the Program
5. Generate network traffic using ping 8.8.8.8.
6. Capture and display

Result:-

Thus, Packet sniffing was successfully using raw sockets on Python, network Packet were captured and their details displayed.

Program :-

```
from scapy.all import sniff, IP
def Packet_callback(Packet):
    if IP in Packet
print("Protocol :", Packet[IP].proto)
print("Source IP :", Packet[IP].src)
print("Destination IP :", Packet[IP].dst)
print("-" * 40)
print("Packet Sniffing started...")
print("Capturing 10 Packets ...")
sniff(prn = Packet_callback, count = 10)
print("Packet Sniffing completed",)
```
