26/7/26 Exp - 4 Local Area Network

Aim:

Setup and configure a LAN using a switch and Ethernet cables in your lab

Steps:

(i) Connect 3-4 host machine to a switch

(ii) Assign ip address to each host machine.

(iii) Check the connecting b/w the machine by using ping command

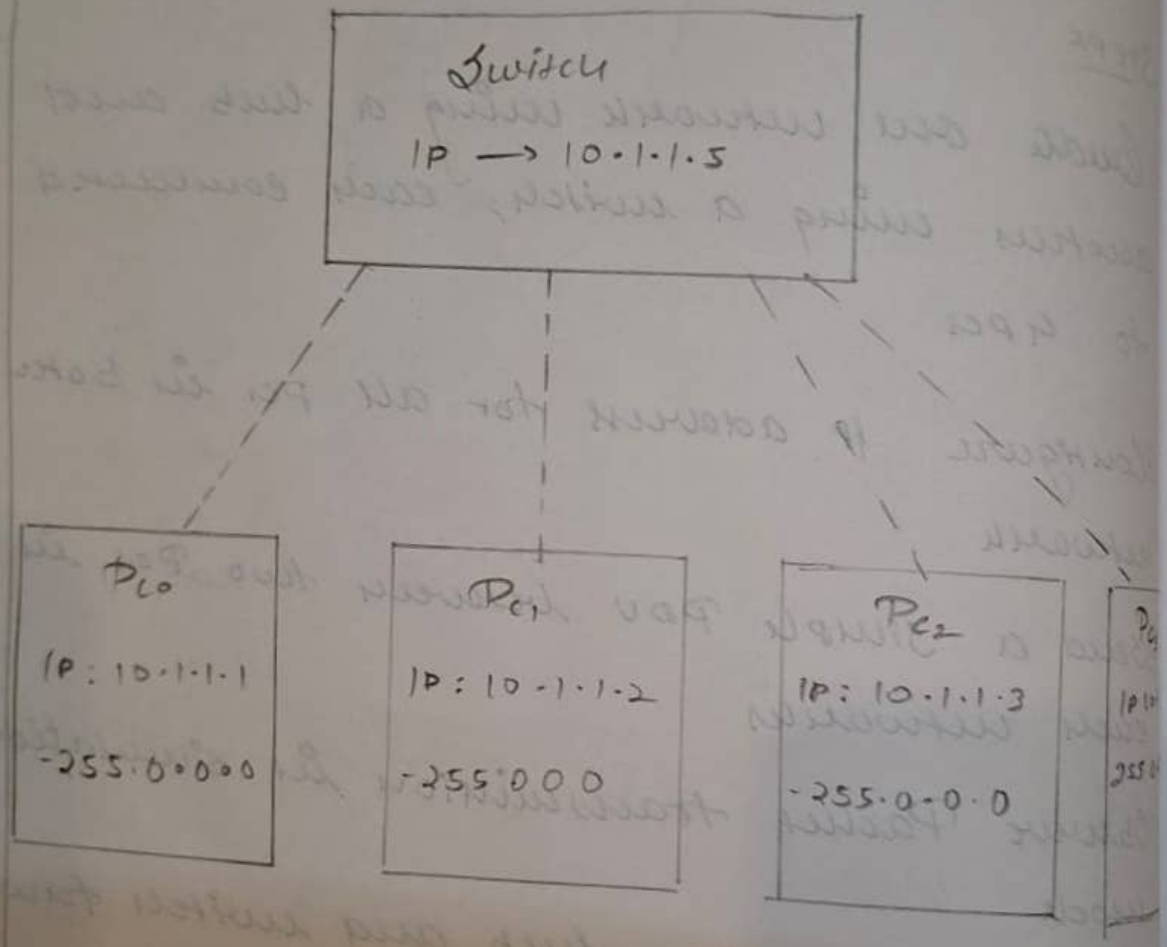

(iv) Check the connectivity between the machine by sharing and access the machine of the LAN. by using ping command in cmd.

(v) Select folder → Go to properties → click sharing tab → share with everyone on same lab.

(vi) Try to access the shared folder from other computer of network.

Result:

The LAN is successfully configurated and set up.
